

## AG USE CONVERSION CHARGE

Property which has benefited from lower property taxes due to its use value assessment as agricultural land may be subject to a conversion charge. This takes place when the agricultural lands use is converted to residential, commercial, or manufacturing use, or becomes exempt and the use is no longer agricultural. The conversion charge is effective upon the assessor's completion of the assessment roll in the year following the change in use. Sec.74.485, WI Statutes governs the application of the conversion charge.

The County Treasurer is responsible for administering the conversion charge. However, the Treasurer cannot act until the actual change in use, verified by a change in class on the assessment roll, is complete. This occurs after the assessor has submitted the roll to the local Board of Review (BOR). Once the BOR is complete (typically between May and October), the assessor provides the County Treasurer a list of the owners who are subject to the conversion charge for converting agricultural acreage in the previous calendar year. Conversion charge letters are issued with payment due within 30 days of issue. Unpaid conversion charges will be added as special charges on the next property tax bill.

- **Use Change Conversion/Acre by County** – An alphabetical listing by county indicating the conversion charge per acre for converting agricultural land as compiled by the Wisconsin Department of Revenue. The first link has conversion rates for the current year and the second link has conversion rates from the previous year:
