October is Breast Cancer Awareness Month

Health Department event to increase breast cancer awareness

The Wisconsin Well Woman Program (WWWP) offers free breast and cervical screenings to low-income women ages 45-64 who are uninsured or underinsured. For women who are ages 35-44, screening services are also available if there are breast or cervical concerns and they meet the program income and insurance eligibility requirements.

More than 40,000 women die annually of breast cancer. October is the month to remember those lost, increase our efforts for those still fighting and spread further awareness of breast cancer. Early detection helps fight breast cancer. This is why regular mammograms are so important.

Due to the National election on November 6th , we felt we would have contact with more people –voters on that day in the Public Agency center so we will be celebrating breast cancer awareness in November. Please join the Health Department **on Tuesday November 6th from 10am to 2pm in the first floor lobby of the Public Agency Center and learn more about WWWP for yourself or a loved one. This celebration will include breast health giveaways and drawings for prizes.**

For more information please contact Janet Arndt RN at 262-335-4513.
